RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 11, 2007

Dear Colleagues:

Welcome to the Thirteenth Annual Author Recognition Celebration, an enjoyable tradition to begin the New Year. Many thanks to Diana J. Cunningham, M.L.S., Associate Dean and Director of the Health Sciences Library, and her staff for organizing this celebration to recognize our faculty authors. The fine sherry always warms up a winter evening.

Oliver Wendell Holmes (1847-1882), the American physician and author, was professor of anatomy and physiology at Harvard and the father of Oliver Wendell Holmes, Jr., the famous associate justice of the U.S. Supreme Court. Professor Holmes realized that authors like to be stroked. In *The Autocrat of the Breakfast Table* he wrote: "I never saw an author in my life – saving perhaps one – that did not purr as audibly as a full-grown domestic cat ... on having his fur smoothed in the right way by a skillful hand."

This Author Recognition Celebration is our chance to stroke our fellow faculty members. They deserve the recognition and we enjoy their purring. Let's raise a glass to all 416 members of the faculty who have published 837 books, chapters, journal articles, editorials, reviews and letters over the past academic year. You bring distinction to yourselves and to New York Medical College. Keep it up and follow Ben Franklin's advice:

*If you would not be forgotten
As soon as you are dead and rotten,
Either write things worth reading,
Or do things worth the writing.*

Sincerely,

Ralph A. O'Connell, M.D.

FACULTY AUTHORS' BIBLIOGRAPHY July 2005 - June 2006

This 2005/06 compilation of New York Medical College (NYMC) faculty scholarship is the thirteenth edition of what is now an annual tradition. Our goal is to celebrate the contributions of faculty from the previous academic year. The staff of the Health Sciences Library produces this bibliography which is available in print and electronic form (<http://library.nymc.edu>). After twelve years, it is becoming an institutional searchable database and soon will be searchable across all years.

Since September 1993, this bibliography and the faculty scholarship it documents are celebrated at the annual Author Recognition Celebration. From the beginning, the Dean and Provost co-sponsors the event with the Library, which we term a *sherry*.

Every effort is made to be as comprehensive as possible. The database begins with letters and submission forms sent to all 2900+ NYMC faculty from all three schools: School of Medicine, School of Basic Medical Sciences, and School of Public Health. Lists of faculty members are as of May 16, 2006. The letter is also sent to department heads, program directors, course coordinators, and the deans of the respective schools. An email reminder follows. In addition, standard bibliographic sources (see below) are searched and added to the database. Remarkably, only twenty percent is duplication. Thirty percent requires manual entry.

To meet model standards of documentation, each citation was verified against a copy of the publication. Annually, a number of web-based citations are submitted; they are documented as *of the date viewed* per current standards. Copies of books and articles were obtained from the author, our collection, or through interlibrary loan. For inclusion, all authors must cite NYMC and *be published between July 1, 2005 and June 30, 2006*. Overall, 837 sources are included representing the publishing efforts of 416 faculty members. Congratulations go to each and every author.

Journals, Journal Articles, Editorials, Reviews, and Letters

Citations are as complete as possible. The following indexing/abstracting sources were searched: PubMed, Web of Science, Scopus, CINAHL, PsycINFO, LEXIS-NEXIS, Biomedical Reference Collection, Nursing and Allied Health Collection, Health Reference Center, Psychology and Behavioral Sciences, Biological Abstracts and websites. The search methodology combines the designated field containing the author affiliation address with the publication years and types of publications. In some databases (e.g. PubMed), only the address of the *first* author is included. This is an inherent limitation when searching the institutional field.

Books and Chapters of Books

The selection of books and chapters of books was made through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books and chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. The first part lists bibliographic citations alphabetized by first author. Each College author who is not a first author is cross-referenced to the first author where the full citation appears. The second part contains a listing of all NYMC authors by departments and/or schools. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977.

This bibliography was compiled and edited by Cheryl Silver, Assistant Professor, Assistant Director of Information Processing. Nina Kurzban, Librarian, Paul-John Ramos, Assistant Collection Development Librarian, and Michael Modugno, Library Assistant, provided invaluable support in the production of this bibliography.

The Health Sciences Library is pleased to acknowledge and promote the scholarly contributions of our faculty. The staff is also pleased to receive the continued support of the President, Provost, Deans, Department Chairs, and most importantly, our publishing faculty.

A handwritten signature in cursive script, appearing to read "Diana J. Cunningham".
