**5. NYMC faculty author whose support enabled the library to accomplish its vision and mission:**

This year we give this award to a person who has been extraordinarily supportive of the library and an advocate of the attainment of information management competencies. Together over 15 years ago together we launched the first thesis prep sessions for Masters' students in the Graduate School of Basic Medical Sciences – a program that continues to be held annually and has grown to 5 sessions. This faculty member routinely refers students to the library for assistance with their information searches, is currently supporting our conceptualization of a university writing center co-supported by the library, and has plans to include his librarian liaison in addressing our competencies in the medical school Biostatistics course. For all this and more, this award goes to:

Dr. Fred Moy, Ph.D., MBA  
Associate Professor of Clinical Pathology and  
Director, Master of Science Programs in Experimental Pathology  
Graduate School of Basic Medical Sciences  
Department of Pathology

**Special mention** of course and clerkship directors and acknowledge those who published during the 2013 academic year: Drs. Thompson, Sharma, Moy, Geliebter, Stallings, and Marks.
