

# FACULTY AUTHORS BIBLIOGRAPHY

## JULY 1994 - JUNE 1995

### INTRODUCTION

The New York Medical College Faculty Authors Bibliography, July 1994-June 1995 is the first annual compilation of faculty scholarship that has been published during the past academic year. It is produced by the staff of the Medical Sciences Library in consultation with the Office of Research Administration and the cooperation of the Offices of the Deans of the School of Medicine, Graduate School of Health Sciences, and Graduate School of Basic Medical Sciences. It will be available by early December in print and in electronic form on the campus network as an option on the Library Database and Services screen.

This bibliography is an outgrowth of the Medical Sciences Library's first *Author Recognition Celebration* that took place on September 22, 1993. The success of that event coupled with enthusiastic support for a more comprehensive event and production of a substantive bibliography resulted in this second celebration and accompanying publication.

Citations are listed from 435 books, chapters of books, journal articles, editorials, reviews and notes, representing the publishing efforts of 321 faculty members. The Offices of the Deans assisted with the identification of some citations that were not readily identified by searching the literature. Only authors who cited their New York Medical College affiliations and who were identified in the scientific literature between July 1, 1994 and June 30, 1995 have been included in the bibliography.

#### **Sources:**

#### **Journal articles, editorials, reviews and notes.**

Listings are as accurate as possible based on information available. The following indexing/abstracting sources were searched: Science Citation Index, MEDLINE, HealthPLAN, PsycLIT. The search methodology combined the designated field containing the author affiliation address with the publication years and types of publications. In addition, letters were sent to chairs of departments soliciting lists of current publications of their faculty. The appropriate Deans were also consulted.

A citation limit must be noted in some databases, such as MEDLINE that include only the address of the first author. There is, therefore, an inherent limitation when searching the institutional field in a database.

Books, chapters of books.

The selection of books or chapters of books was made through the library

acquisition lists. For the most part, books or chapters of books are not readily identifiable in available electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books or chapters.

Arrangement:

The arrangement of the bibliography is in two parts: by author and by department. Citations for both parts are formatted in accordance with Index Medicus, which conforms to American National Standards Institute Z39.29-1977. The first part contains a listing of bibliographic citations alphabetized by first authors. Each College author who is not a first author is cross-referenced to the full citation under the name of the first author. The second part contains a listing of all College authors by departments and/or schools.

The Medical Sciences Library is pleased to acknowledge and promote the scholarly contributions of the faculty. This work was compiled by Luiza Balthazar, Assistant Professor, Associate Director and Head of Information Processing at the Medical Sciences Library. The Library invites comments and suggestions at any time.

Diana Cunningham, Assistant Professor  
Director  
November 14, 1995

Do not stop to think about the reasons for what you are doing, about why you are questioning. Curiosity has its own reason for existence. One cannot help but be in awe when he contemplates the mysteries of eternity, of life, of the marvelous structure of reality. It is enough if one tries merely to comprehend a little of this mystery each day. Never lose a holy curiosity.

Albert Einstein

This work is dedicated to the New York Medical College faculty in grateful recognition of their achievements and with deep respect for their continuous search for truth.

Rev. Harry C. Barrett, D.Min., M.P.H.  
Diana Cunningham, M.L.S.
