*Valhalla, New York*

*January 8, 2014*

Every effort was made to identify all New York Medical College faculty authors who published between July 1, 2012 and June 30, 2013. We sincerely regret any omissions or inadvertent errors.

NEW YORK MEDICAL COLLEGE

---

40 SUNSHINE COTTAGE ROAD  
VALHALLA, NEW YORK 10595 TEL 914-594-4900 FAX 914-594-4145

EDWARD C. HALPERIN, M.D., M.A.  
CHANCELLOR FOR HEALTH AFFAIRS  
CHIEF EXECUTIVE OFFICER

December 12, 2013

Dear Colleagues.

New York Medical College is a community of scholars that exists for the generation, conservation, and dissemination of knowledge regarding the causes, prevention, and treatment of human disease and disability. There are many forces at work in society which seek to place other missions upon our agenda economic development, job creation, real estate development, social reform, and political involvement. While, to some extent, we are of necessity engaged in these activities it should not divert us from what we truly are: a community of scholars. Clear evidence of fulfilling our mission is the publication of knowledge in peer reviewed biomedical scientific journals and books. Discovery science is incomplete unless the information which is generated is communicated to others. At our annual recognition event, we celebrate this effort and our mission.

We celebrate, at the author recognition event, the transgenerational nature of our efforts. We seek, through publication, to communicate our findings to others and ultimately to make healthcare better for our grandchildren than it is for us.

This surely must be sacred work in the secular lives of humans.

Sincerely yours,

Edward C. Halperin, M.D., M.A.

## FACULTY AUTHORS' BIBLIOGRAPHY July 2012 - June 2013

What began twenty years as an event celebrating recently published faculty book authors of New York Medical College (NYMC) has become an annual bibliography and reception. Deans and staff change, but the goal remains the same: celebrate the scholarship of NYMC faculty authors.

For 2013, this bibliography is available online: <http://library.nymc.edu/bibliog/>, along with all earlier nineteen editions. After twenty years, these editions now form a body of publications that helps to tell the story of scholarship and research at this institution.

Only a limited number of print copies will be produced this year. The online link provides access to every bibliography published and can be browsed by author, journal title, or academic department and is easily searchable by keyword, title or department. Links to full-text articles are available through NYMC Article Linker.

Every effort has been made to be as comprehensive as possible. The college's author database begins with letters and submission forms sent to NYMC faculty from all schools: School of Medicine, Graduate School of Basic Medical Sciences, and School of Health Sciences and Practice. The letter is also sent to department heads, program directors, course coordinators, and the deans. An email reminder follows. In addition, standard bibliographic sources (see below) are searched and references found are added to the database. However, at least 25% of the entries are entered manually.

For inclusion in this bibliography, all authors must cite NYMC as their affiliation and their works must have been **published between July 1, 2012 and June 30, 2013**. For 2012/2013 a total of 991 items have been included broken down as follows: 369 authors, 16 books, 71 book chapters, 794 journal articles, 100 letters/communications, 60 web pages, and 103 faculty members who served on various editorial boards.

### Journal Citations

Citations are as complete as possible and are verified against the actual article. The following resources were searched: PubMed, Web of Science, Scopus, CINAHL, PsycINFO, Biomedical Reference Collection, Nursing and Allied Health Collection, Health Reference Center, Psychology and Behavioral Sciences Collection, and various websites. The search methodology used combines the author affiliation address with the publication year and publication type; however, the affiliations of secondary authors are generally not indexed.

Possibly the biggest change over the past twenty years is the explosion of electronic resources. The NYMC Health Sciences Library receives only 18 journal titles exclusively in print; and it is the norm for most articles to be available electronically. Often, these articles are available as electronic publications ("eprints") weeks or months before their official print publication dates. Because these articles are so common and readily available, it was decided this year to include these articles which have not been "officially" published in print, but are readily accessible. Also, this edition includes a special section acknowledging those faculty members who serve as journal editors or on editorial boards.

### **Books and Book Chapters**

The selection of books and chapters of books is made through library acquisition lists and author submissions. Traditionally, books have not been readily available or indexed in electronic databases. This is changing as e-books are now being added to library databases such as ClinicalKey and Ovid. Authors are always encouraged to alert the library about newly published items.

### **Websites and Other Resources**

Scholarship is disseminated in many different formats now, and in recent years the library has begun including scholarly web pages and DVDs in the faculty bibliography. Authors are encouraged to submit links or information about material in any format and the library will determine if it is suitable for inclusion.

### **Arrangement**

The print bibliography is arranged in three main sections: citations to publications listed by the first author, editorial board memberships, and a listing of authors within department or school. Cross references link NYMC co-authors' entries to those of primary authors. Citations follow the National Library of Medicine style.

### **Acknowledgements**

Nina Kurzban has helped produce the bibliography for many years, but this edition was the first time she led the creation process. Nina has tenaciously trained a new staff to organize and produce this bibliography. The so-called torch has been passed on!

We are grateful for all the assistance we have received in continuing this tradition. We thank the faculty authors for their contributions and scholarship. We especially thank Dr. Halperin, our Chancellor for Health Affairs and Chief Executive Office, for supporting the continuation of this process.

This may be the last print edition, but every effort continues to communicate with faculty and promote their tireless and significant scholarship. We applaud you! For more information or to request a copy (subject to availability), please contact Judy Gitlin directly at [Judith\\_gitlin@nymc.edu](mailto:Judith_gitlin@nymc.edu)
