RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 16, 2008

Dear Colleagues:

Welcome to the Fourteenth Annual Author Recognition Celebration. Thanks to Diana J. Cunningham, M.L.S., Associate Dean and Director of the Health Sciences Library, and her staff this has become a very welcome tradition to welcome in the New Year. The fine sherry always warms up a winter evening.

It is good to see the smiles on the faculty faces as they accept their awards. Oliver Wendell Holmes (1847-1882), the American physician and author, was professor of anatomy and physiology at Harvard and the father of Oliver Wendell Holmes, Jr., the famous associate justice of the U.S. Supreme Court. Professor Holmes realized that authors like to be stroked. In *The Autocrat of the Breakfast Table* he wrote: "I never saw an author in my life – saving perhaps one – that did not purr as audibly as a full-grown domestic cat ... on having his fur smoothed in the right way by a skillful hand."

This Author Recognition Celebration is our chance to stroke our fellow faculty members. They deserve the recognition and we enjoy their purring. Let's raise a glass to all 420 members of the faculty who have published 863 books, chapters, journal articles, editorials, reviews and letters over the past academic year. You bring distinction to yourselves and to New York Medical College. Keep it up and follow Ben Franklin's advice:

*If you would not be forgotten
As soon as you are dead and rotten,
Either write things worth reading,
Or do things worth the writing.*

Sincerely,

A handwritten signature in black ink, appearing to read "Ralph A. O'Connell".

Ralph A. O'Connell, M.D.

NYMC FACULTY AUTHOR BIBLIOGRAPHY

July 2006 - June 2007

This 2006/07 compilation of New York Medical College (NYMC) faculty scholarship is the fourteenth edition of what is now an annual tradition. Our goal is to celebrate the contributions of NYMC faculty from the previous academic year. The staff of the Health Sciences Library produces this bibliography which is available in print and electronic form (<http://library.nymc.edu>). After fourteen years, it is now a searchable database.

Since September 1993, this bibliography and the faculty scholarship documented are celebrated at the annual Author Recognition Celebration. From the beginning, the Dean and Provost co-sponsors the event with the Library, which we term a *sherry*.

Every effort is made to be as comprehensive as possible. The database begins with letters and submission forms sent to all 3000+ NYMC faculty from all three schools: School of Medicine, School of Basic Medical Sciences, and School of Public Health. Lists of faculty members are as of May 21, 2007. The letter is also sent to department heads, program directors, course coordinators, and the deans of the respective schools. An email reminder follows. In addition, standard bibliographic sources (see below) are searched and added to the database.

Remarkably, only twenty percent is duplication. Thirty percent requires manual entry.

To meet model standards of documentation, each citation is verified against a copy of the publication. Annually, a number of web-based citations are submitted; they are documented as of *the date viewed* per current standards. Copies of books and articles are obtained from the author, our collection, or through interlibrary loan. For inclusion, all authors must cite NYMC and be published between July 1, 2006 and June 30, 2007. Overall, 863 sources are included representing the publishing efforts of 420 faculty members. Congratulations go to each and every author.

Journals, Journal Articles, Editorials, Reviews, and Letters

Citations are as complete as possible. The following indexing/abstracting sources were searched: PubMed, Web of Science, Scopus, CINAHL, PsycINFO, LEXIS-NEXIS, Biomedical Reference Collection, Nursing and Allied Health Collection, Health Reference Center, Psychology and Behavioral Sciences, Biological Abstracts and websites. The search methodology combines the designated field containing the author affiliation address with the publication years and types of publications. In some databases (e.g. PubMed), only the address of the *first* author is included. This is an inherent limitation when searching the institutional field.

Books and Chapters of Books

The selection of books and chapters of books is done through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books and chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by academic department. The first part lists bibliographic citations alphabetized by first author. Each College author who is not a first author is cross-referenced to the first author where the full citation appears. The second part contains a listing of all NYMC authors by academic department and/or school. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977.

This bibliography was compiled and edited by Cheryl Silver, Assistant Professor, Assistant Director of Information Processing. Nina Kurzban, Librarian, and Michael Modugno, Library Assistant, provided invaluable support in the production of this bibliography.

The Health Sciences Library is pleased to acknowledge and promote the scholarly contributions of our faculty. The staff is also pleased to receive the continued support of the President, Provost, Deans, Department Chairs, and most importantly, our publishing faculty.
