

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4600 FAX 914-594-4145

REV. MSGR. HARRY C. BARRETT, D. MIN., M.P.H.
PRESIDENT AND CHIEF EXECUTIVE OFFICER

January 12, 1999

Dear Faculty Scholars:

Five years ago, thanks to the initiative of our Medical Sciences Library staff, we began what has grown to be a wonderful tradition here at New York Medical College, the Author Recognition Celebration. It is our opportunity to take a moment to affirm the university's responsibility to advance the body of knowledge. So today, we join to salute the accomplishments of our distinguished faculty members who have published during the past year in the fields of medicine, science and health care.

Admitting that all of us enjoy these too infrequent interludes from busy schedules does not diminish the significance of this time we set aside. By our presence here we acknowledge that publishing a body of scholarly work requires effort and that those who do so are deserving of commendation.

Personally, and on behalf of our entire academic community, congratulations to all our faculty authors. Thank you for the contributions you have made in your respective fields and for the renown you bring to New York Medical College by your published work.

Sincerely,

Rev. Msgr. Harry C. Barrett, D.Min., M.P.H.

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4900 FAX 914-594-4145

RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 12, 1999

Dear Faculty Authors:

This Fifth Annual Author Recognition Celebration, so ably organized by our Associate Dean Diana J. Cunningham, M.L.S., and the staff of the Medical Sciences Library, has become a welcome feature of the academic year, brightening up a mid-winter evening. More than 300 members of the New York Medical College faculty have collectively contributed over 500 articles, books, chapters etc. to the world's scientific literature over the past year. These are all contained in this year's *Faculty Bibliography* you have received and will be available in cyberspace on the College's web page (www.nymc.edu).

A faculty's publications reflect the scholarly activity of the university. The observations, discoveries, experiments, opinions and reviews contained in the scientific literature make up a dynamic body of knowledge, which grows and self-corrects over the years. This literature has been historically collected in libraries, although libraries now extend beyond their walls. Santiago Ramón y Cajal, winner of the Nobel Prize in 1906 for his contributions to neuroanatomy, wrote: "Libraries are successively the cradles and the sepulchres of the human mind". The National Library of Medicine now has over 5 million books in its collection. Over 3,000 journals are cited in *Index Medicus*. New York Medical College consistently makes an important contribution to this dynamic process.

Congratulations to all. You bring great credit to yourselves and to New York Medical College.

Sincerely,

Ralph A. O'Connell, M.D.

FACULTY BIBLIOGRAPHY

July 1997 - June 1998

INTRODUCTION

The New York Medical College Faculty Bibliography, July 1997-June 1998, is the fourth annual compilation of faculty scholarship that has been published during the past academic year. It is produced by the staff of the Medical Sciences Library. It is available in print and in electronic form, and is accessible on the campus network as an option on the Medical Sciences Library WWW homepage.

This bibliography is an outgrowth of the Medical Sciences Library's first Author Recognition Celebration that took place on September 22, 1993. The success of that event coupled with enthusiastic support for a more comprehensive event and production of a substantive bibliography resulted in this publication.

Citations are listed from 544 books, chapters of books, journal articles, editorials, reviews and notes, representing the publishing efforts of 332 faculty members. Included in the faculty totals are the students authors we have been able to identify for the first time this year; they represent our future in scientific research. Only authors who cited their New York Medical College affiliations and who were identified in the scientific literature between July 1, 1997 and June 30, 1998 have been included in the bibliography.

Sources

Journal Articles, Editorials, Reviews and Notes.

Listings are as accurate as possible based on information available. The following indexing/abstracting sources were searched: Science Citation Index, MEDLINE, PubMed, CINAHL, EMBASE, PsycLIT, HealthSTAR. The search methodology combined the designated field containing the author affiliation address with the publication years and types of publications. In addition, letters were sent to chairs of departments, program directors, course coordinators soliciting lists of current publications of their faculty. The appropriate deans were also consulted.

A citation limit must be noted in some databases, such as MEDLINE, that include only the address of the first author. There is, therefore, an inherent limitation when searching the institutional field in a database.

Books, Chapters of books.

The selection of books or chapters of books was made through library acquisition lists. For the most part, books or chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books or chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977. The first part contains a listing of bibliographic citations alphabetized by first authors. Each college author who is not a first author is cross-referenced to the full citation under the name of the first author. The second part contains a listing of all College authors by departments and/or schools.

The Medical Sciences Library is pleased to acknowledge and promote the scholarly contributions of the faculty. This work is compiled by Luiza Balthazar, Assistant Professor, Associate Director and Head of Information Processing at the Medical Sciences Library. The Library invites comments and suggestions at any time.

**Fifth Annual
Medical Sciences Library
New York Medical College
Author Recognition Celebration
January 12, 1999**

Program

Welcome

Diana J. Cunningham, M.L.S.
Associate Dean & Director, Medical Sciences Library
Assistant Professor, Department of Biomedical Sciences

Remarks

Ralph A. O'Connell, M.D.
Provost

Steven L. Sivak, M.D.
Associate Professor of Clinical Medicine
Chairman, Library & Academic Support Committee

Presentation of Awards

Toast of the Authors

Duets performed by:
Brian Brosnan and Anna Hsieh, Class of 2000

- Thomas S; Cheng A; **Frishman WH**. Pharmacokinetic properties of approved cardiovascular drugs. In: Frishman, William H.; Sonnenblick, Edmund H. Cardiovascular pharmacotherapeutics companion handbook. New York: McGraw-Hill; 1998. pp. 506-39.
- Thompson CI.** see Laycock SK
- Tiamson MLA, Mcardle R, Girolamer T, **Horowitz HW**. The Institutional Memorial Service - A strategy to prevent burnout in HIV health-care workers. Gen Hosp Psychiatry 1998;20(2):124-6.
