REV. MSGR. HARRY C. BARRETT D. MIN., M.P.H.
PRESIDENT AND CHIEF EXECUTIVE OFFICER

January 8, 2001

Dear Faculty Scholars:

Congratulations!

It is a tribute to all of you collectively and to each of you individually that so many members of our academic community are gathered here today to acknowledge the work you have published during the past year. As I view it, there are really two essential purposes of a university--to advance knowledge by scholarly research and to impact knowledge to those who seek wisdom. By your efforts, you have done both.

We take pride in what you have accomplished and thank you for advancing knowledge in your respective fields of medicine, education and health care. You bring honor to New York Medical College by association with your work.

I would also like to express the university's appreciation to Diana Cunningham, M.L.S., M.P.H., and the Medical Sciences Library staff who graciously host this Author Recognition Celebration each year. We look forward to it and welcome the chance to be together to salute our faculty's achievements.

Sincerely,

Rev. Msgr. Harry C. Barrett, D.Min., M.P.H.

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4900 FAX 914-594-4145

RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 8, 2001

Dear Faculty Authors:

Welcome to the Seventh Annual Author Recognition Celebration. This event has become a very enjoyable event in the academic year. Our Associate Dean and Director of the Medical Sciences Library, Diana J. Cunningham, M.L.S., and her staff are to be congratulated on organizing this celebration to recognize our faculty authors. The traditional fine sherry always warms up a winter evening.

Research and writing are at the heart of a university. Whether on papyrus or the Internet, contributions to the scientific literature advance biomedicine and contribute to understanding disease and to promoting health. My congratulations to all whom have published over the past academic year. You bring honor to yourselves and New York Medical College.

Sir William Osler, the father of modern academic medicine, had an extensive personal library, now housed at the McGill University Faculty of Medicine in Montreal. Osler's favorite book was Sir Thomas Browne's *Religio Medici*. Browne was a 17th century English physician and writer, noted for his erudition and style. Today's reader will find *Religio Medici* somewhat difficult. Osler had several copies in his library and kept one by his bedside. Anyway, Browne made the following point about authors:

Some men have written more than others have spoken.

Our faculty doesn't seem to have much trouble either talking or writing. It is a pleasure to recognize so many of you who have contributed to the literature. You are a great example to your students.

Sincerely,

Ralph A. O'Connell, M.D.

FACULTY AUTHORS BIBLIOGRAPHY

July 1999 - June 2000

INTRODUCTION

The New York Medical College Faculty Authors Bibliography, July 1999-June 2000, is the seventh annual compilation of faculty scholarship that has been published during the past academic year. The bibliography is produced by the staff of the Medical Sciences Library and is available in print and in electronic form. The electronic form is accessible on the campus network as an option on the Medical Sciences Library WWW homepage (<http://library.nymc.edu>).

This bibliography is an outgrowth of the Medical Sciences Library's first Author Recognition Celebration that took place on September 22, 1993. The success of that event coupled with enthusiastic support for a more comprehensive event and production of a substantive bibliography resulted in this publication.

Citations are included from 817 books, book chapters, journals, journal articles, editorials, reviews and letters, representing the publishing efforts of 446 faculty members. Authors whose writings were published between July 1, 1999 and June 30, 2000 have been included in this bibliography. The faculty database listings have been provided by the New York Medical College's School of Medicine, Graduate School of Basic Medical Sciences, and the Graduate School of Health Sciences as of November 11, 2000.

Sources

Journals, Journal Articles, Editorials, Reviews and Letters.

Citations are as accurate as possible based on the information available. The following indexing/abstracting sources were searched: Science Citation Index, MEDLINE, PubMed, CINAHL, EMBASE(Psychiatry), PsycLIT, HealthSTAR and LEXIS-NEXIS. The search methodology combined the designated field containing the author affiliation address with the publication years and types of publications. In addition, letters were sent to chairs of departments, program directors and course coordinators soliciting lists of current publications of their faculty. The appropriate deans were also consulted.

A citation limit must be noted in some databases, such as MEDLINE, that include only the address of the first author. There is, therefore, an inherent limitation when searching the institutional field in a database.

Books and Chapters of books.

The selection of books and chapters of books was made through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books and chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977. The first part contains a listing of bibliographic citations alphabetized by first authors. Each college author who is not a first author is cross-referenced to the full citation under the name of the first author. The second part contains a listing of all College authors by departments and/or schools.

This bibliography is compiled and edited by Cheryl Silver, Assistant Professor and Head, Information Processing. Maritza Campbell, Assistant Collection Development Librarian and Nina Kurzban, Librarian, provided invaluable support in the production of this bibliography.

The Medical Sciences Library is pleased to acknowledge and promote the scholarly contributions of the faculty. The staff is even more pleased to receive the support of the President, Provost, Deans, Department Chairs, and most importantly our publishing faculty.

The Library invites comments and suggestions at any time.

Diana Cunningham, Associate Dean and Director

Author Bibliography Submission Form

The Medical Sciences Library staff continues to compile citations for the next annual faculty bibliography. If you have authored publications published between July 1, 2000 and June 30, 2001 please fill out the following form and return it (along with a copy of the reprint or book, if possible) to:

Cheryl Silver
Medical Sciences Library
Basic Sciences Building
New York Medical College
