REV. MSGR. HARRY C. BARRETT, D.Min., M.P.H.
PRESIDENT AND CHIEF EXECUTIVE OFFICER

January 2003

Dear Faculty Scholars:

The compendium you hold in your hands represents a legacy of achievement by you and your colleagues, one that taps into the excellence of this university in many ways.

On one level it shows the variety, breadth and depth of scientific inquiry underway at the College, day after day, year after year. Although several of the published works found in these pages drew the attention of news media by virtue of their relevance to matters that most concern the public today, they take their place among hundreds of publications of equal stature and importance. Cited within these pages are research studies and thoughtful discourse in the clinical and basic sciences, behavioral studies, speech-language pathology, physical therapy—the list goes on and on. This impressive output reflects a dual commitment on the part of our faculty: to engage in intellectual and scientific exploration and to share their insights so that all might partake of their benefit.

You, our faculty authors, burnish the reputation of New York Medical College with your diligence and commitment to scientific inquiry, a pursuit that has fundamental significance to the advancement of biomedical science. We thank you for your dedication, and we take great pride in honoring you and your achievements.

I would be remiss if I did not point out that the assembly of these pages, through the devoted efforts of the director and staff of the Medical Sciences Library, is an achievement in its own right. Our thanks go to them as well, for enabling us to see this yearly retrospective of our aggregate achievements. They, and you, do us proud.

Congratulations to all!

Sincerely,

Rev. Msgr. Harry C. Barrett, D.Min., M.P.H.

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4900 FAX 914-594-4145

RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 2003

Dear Colleagues:

Welcome to the Ninth Annual Author Recognition Celebration, an enjoyable tradition to begin the New Year. The fine sherry always warms up a winter evening. Many thanks to Diana J. Cunningham, M.L.S., Associate Dean and Director of the Medical Sciences Library, and her staff for organizing this celebration to recognize our faculty authors.

The scholarly pursuit of research and writing are at the heart of a university. Whether on papyrus or the Internet, contributions to the scientific literature advance biomedicine and contribute to our understanding of disease mechanisms and treatment. Congratulations to all the members of the faculty who have published over the past academic year. You bring distinction to yourselves and to New York Medical College.

Oliver Wendell Holmes (1847-1882), the American physician and author, was also professor of anatomy and physiology at Harvard. (His son, Oliver Wendell Holmes, Jr., was the famous associate justice of the U.S. Supreme Court.) Holmes, Sr. realized that authors like to be stroked. In *The Autocrat of the Breakfast Table* he wrote:

I never saw an author in my life – saving perhaps one – that did not purr as audibly as a full-grown domestic cat ... on having his fur smoothed in the right way by a skillful hand.

This Author Recognition Celebration is our chance to stroke our fellow faculty members for their work. They deserve the recognition and we enjoy their purring.

Sincerely,

Ralph A. O'Connell, M.D.

FACULTY AUTHORS BIBLIOGRAPHY

July 2001 - June 2002

INTRODUCTION

The New York Medical College Faculty Authors Bibliography, July 2001-June 2002, is the ninth annual compilation of faculty scholarship that has been published during the past academic year. The bibliography is produced by the staff of the Medical Sciences Library and is available in print and electronic form. The electronic form is accessible on the campus network as a link on the Medical Sciences Library's WWW homepage (<http://library.nymc.edu>).

This bibliography is an outgrowth of the Medical Sciences Library's first Author Recognition Celebration on September 22, 1993. The success of that first event generated enthusiastic support for more comprehensive recognition and the desire for a substantive bibliography which resulted in this publication. In January 2002 the event was co-sponsored as a faculty development activity.

The creation of the database began with letters and submission forms sent in July 2002, to over 2900 NYMC faculty members. The same letter was also sent to department heads, program directors, course coordinators, and the deans of the respective schools. This letter was then followed by an email reminder (September 2002). In addition the standard bibliographical sources, mentioned below, were searched and added to our database. Some duplication occurred but was later eliminated; 34% (232 citations) required manual entry.

In an effort to meet model standards of documentation, each submitted citation was verified by obtaining a copy of the publication. Copies were obtained from the author, from the MSL collection or through interlibrary loan. All authors should cite New York Medical College and have published between July 1, 2001 and June 30, 2002. Sources included 679 books, book chapters, journals, journal articles, editorials, reviews, letters, newspaper articles, media, and electronic sources, representing the publishing efforts of 370 faculty members.

Lists of faculty members were provided by New York Medical College's School of Medicine, Graduate School of Basic Medical Sciences, and School of Public Health as of July 18, 2002.

Sources

Journals, Journal Articles, Editorials, Reviews and Letters.

Citations are as accurate as possible based on the information available. The following indexing/abstracting sources were searched: MEDLINE, PubMed, Web of Science, CINAHL, EMBASE(Psychiatry), PsycINFO, HealthSTAR, LEXIS-NEXIS, and websites. The search methodology combined the designated field containing the author affiliation address with the publication years and types of publications. The user of this bibliography needs to know that in some databases, such as PubMed, only the address of the first author is included. There is, therefore, an inherent limitation when searching the institutional field in a database.

Books and Chapters of books.

The selection of books and chapters of books was made through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books and chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977. The first part contains a listing of bibliographic citations alphabetized by first author. Each college author who is not a first author is cross-referenced to the first author. The full citation appears under the name of the first author. The second part contains a listing of all NYMC authors by departments and/or schools.

This bibliography is compiled and edited by Cheryl Silver, Assistant Professor, Assistant Director of Information Processing. Nina Kurzban, Librarian, Paul-John Ramos, Assistant Collection Development Librarian, and Michael Modugno, Library Assistant, provided invaluable support in the production of this bibliography.

The Medical Sciences Library is pleased to acknowledge and promote the scholarly contributions of the faculty. The staff is even more pleased to receive the support of the President, Provost, Deans, Department Chairs, the Office of Faculty Development, and most importantly, our publishing faculty.

The Library invites comments and suggestions at any time.

Diana Cunningham, Associate Dean and Director
