RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 13, 2004

Dear Colleagues:

Welcome to the Tenth Annual Author Recognition Celebration, an enjoyable tradition to begin the New Year. Many thanks to Diana J. Cunningham, M.L.S., Associate Dean and Director of the Medical Sciences Library, and her staff for organizing this celebration to recognize our faculty authors. The fine sherry always warms up a winter evening.

Oliver Wendell Holmes (1847-1882), the American physician and author, was professor of anatomy and physiology at Harvard. (His son, Oliver Wendell Holmes, Jr., was the famous associate justice of the U.S. Supreme Court.) Professor Holmes realized that authors like to be stroked. In *The Autocrat of the Breakfast Table* he wrote: "I never saw an author in my life – saving perhaps one – that did not purr as audibly as a full-grown domestic cat ... on having his fur smoothed in the right way by a skillful hand."

Whether on papyrus or the Internet, contributions to the scientific literature advance biomedicine and add to our understanding of disease mechanisms and treatment. This Author Recognition Celebration is our chance to stroke our fellow faculty members for their work. They deserve the recognition and we enjoy their purring. Let's raise a glass to all 400 members of the faculty who have published more than 900 books, chapters, journal articles, editorials, reviews and letters over the past academic year. You bring distinction to yourselves and to New York Medical College.

Sincerely,

Ralph A. O'Connell, M.D.

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4600 FAX 914-594-4145

REV. MSGR. HARRY C. BARRETT, D.MIN., M.P.H.
PRESIDENT AND CHIEF EXECUTIVE OFFICER

January 2004

Dear Faculty Scholars:

The compendium you hold in your hands represents a legacy of achievement by you and your colleagues, one that taps into the excellence of this university in many ways.

On one level it shows the variety, breadth and depth of scientific inquiry underway at the College, day after day, year after year. Although several of the published works found in these pages drew the attention of news media by virtue of their relevance to matters that most concern the public today, they take their place among hundreds of publications of equal stature and importance. Cited within these pages are research studies and thoughtful discourse in the clinical and basic sciences, behavioral studies, speech-language pathology, physical therapy—the list goes on and on. This impressive output reflects a dual commitment on the part of our faculty: to engage in intellectual and scientific exploration and to share their insights so that all might partake of their benefit.

You, our faculty authors, burnish the reputation of New York Medical College with your diligence and commitment to scientific inquiry, a pursuit that has fundamental significance to the advancement of biomedical science. We thank you for your dedication, and we take great pride in honoring you and your achievements.

I would be remiss if I did not point out that the assembly of these pages, through the devoted efforts of the director and staff of the Medical Sciences Library, is an achievement in its own right. Our thanks go to them as well, for enabling us to see this yearly retrospective of our aggregate achievements. They, and you, do us proud.

Congratulations to all!

Sincerely,

A handwritten signature in black ink, appearing to read "H. C. Barrett".

Rev. Msgr. Harry C. Barrett, D.Min., M.P.H.

FACULTY AUTHORS BIBLIOGRAPHY

July 2002 - June 2003

INTRODUCTION

This compilation of New York Medical College (NYMC) faculty scholarship for 2002/03 is the tenth edition of what is now an annual tradition. Our goal continues to celebrate the contributions of faculty from the previous academic year. The staff of the Health Sciences Library produces this bibliography, which is available in print and electronic form (available at <http://library.nymc.edu>).

Since September 1993, this bibliography and the faculty scholarship it documents are celebrated at the annual Author Recognition Celebration. From the beginning the Dean and Provost co-sponsor the event with the Library, which we term a *sherry*. It is now a faculty development activity for the University.

Every effort is made to be as comprehensive as possible. The database begins with letters and submission forms sent to over 2900 NYMC faculty from all three schools: School of Medicine, School of Basic Medical Sciences, and School of Public Health. Lists of faculty members are as of May 6, 2003. The letter is also sent to department heads, program directors, course coordinators, and the deans of the respective schools. An email reminder follows. In addition, standard bibliographical sources, mentioned below, are searched and added to the database. Only twenty percent is duplication, with thirty-seven percent requiring manual entry.

To meet model standards of documentation, each submitted citation was verified by obtaining a copy of the publication. Copies were obtained from the author, from the Library's collection, or through interlibrary loan. For inclusion, all authors should cite NYMC and have published between July 1, 2002 and June 30, 2003. Sources included 908 books, book chapters, journals, journal articles, editorials, reviews, letters, newspaper articles, media, and electronic sources, representing the publishing efforts of 414 faculty members.

Sources

Journals, Journal Articles, Editorials, Reviews and Letters.

Citations are as accurate and as complete as possible based on the information available. The following indexing/abstracting sources were searched: PubMed, Web of Science, CINAHL, PsycINFO, LEXIS-NEXIS, Biomedical Reference Collection, Nursing and Allied Health Collection, Health Reference Center, Psychology and Behavioral Sciences and websites. The search methodology combines the field containing the author affiliation address with the publication years and types of publications. It is important to note that some databases, such as PubMed, include only the address of the first author. There is an inherent limitation when searching for author affiliation.

Books and Chapters of books.

The selection of books and chapters of books is made through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books or book chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977. The first part contains a listing of bibliographic citations alphabetized by first author. Each additional NYMC author is cross-referenced to the first. The second part contains a listing of all NYMC authors by departments and/or schools.

This bibliography is compiled and edited by Cheryl Silver, Assistant Professor and Assistant Director of Information Processing. Nina Kurzban, Paul-John Ramos, and Michael Modugno all provided invaluable support in the production of this bibliography.

The Health Sciences Library is pleased to continue the promotion of the significant scholarly contributions of NYMC faculty. The staff is even more pleased to receive the support of the President, Provost, Deans, Department Chairs, and Office of Faculty Development.

Above all, we *toast* our published faculty for a tenth record year and a milestone of its own. Questions or comments should be directed to Ms. Cheryl Silver or to me as director.
