REV. MSGR. HARRY C. BARRETT, D.Min., M.P.H.
PRESIDENT AND CHIEF EXECUTIVE OFFICER

January 2005

Dear Faculty Authors and Guests,

Once again we gather to recognize the vast body of writing produced by faculty authors during the previous academic year. We are here to laud the work, but most especially the people. In fact, take a moment and look around. The people you see gathered here today—roses in their lapels, thick printed programs under their arms—are the pride of New York Medical College.

Take a moment to leaf through this program. It lists hundreds of recently published scholarly works by the people in our midst, and by many more who are not present—possibly because they may be hard at work on a new discovery or theory. For some it's their first time in print; others have been published dozens, even scores of times before. Every one of them has rightfully earned our gratitude and praise.

This distinguished group of authors—whose work represents all three schools, bench and clinical science, education and administration—adds to the pride and prestige of this university. They do us honor by continuing to strive for academic and scientific excellence, by seeking broader, deeper knowledge and imparting it to the world through publication. They amplify our talent and reputation, enhance the collegial environment, and instill pride in every single person who works or studies at this institution.

As well, our sincere thanks and appreciation go to the dedicated staff of the Health Sciences Library, those who collected and assembled this impressive document of achievement and their director, Diana J. Cunningham, M.L.S., M.P.H.'00, associate dean.

Congratulations to all.

Sincerely,

Rev. Msgr. Harry C. Barrett, D.Min., M.P.H.

NEW YORK MEDICAL COLLEGE

VALHALLA, NEW YORK 10595 TEL 914-594-4900 FAX 914-594-4145

RALPH A. O'CONNELL, M.D.
PROVOST AND DEAN, SCHOOL OF MEDICINE

January 11, 2005

Dear Colleagues:

Welcome to the Eleventh Annual Author Recognition Celebration, an enjoyable tradition to begin the New Year. Many thanks to Diana J. Cunningham, M.L.S., Associate Dean and Director of the Medical Sciences Library, and her staff for organizing this celebration to recognize our faculty authors. The fine sherry always warms up a winter evening.

Oliver Wendell Holmes (1847-1882), the American physician and author, was professor of anatomy and physiology at Harvard and the father of Oliver Wendell Holmes, Jr., the famous associate justice of the U.S. Supreme Court. Professor Holmes realized that authors like to be stroked. In *The Autocrat of the Breakfast Table* he wrote: "I never saw an author in my life – saving perhaps one – that did not purr as audibly as a full-grown domestic cat ... on having his fur smoothed in the right way by a skillful hand."

This Author Recognition Celebration is our chance to stroke our fellow faculty members. They deserve the recognition and we enjoy their purring. Let's raise a glass to all 366 members of the faculty who have published 750 books, chapters, journal articles, editorials, reviews and letters over the past academic year. You bring distinction to yourselves and to New York Medical College. Keep it up and follow Ben Franklin's advice:

*If you would not be forgotten
As soon as you are dead and rotten,
Either write things worth reading,
Or do things worth the writing.*

Sincerely,

Ralph A. O'Connell, M.D.

FACULTY AUTHORS BIBLIOGRAPHY

July 2003 - June 2004

INTRODUCTION

This 2003/04 compilation of New York Medical College (NYMC) faculty scholarship is the eleventh edition of what is now an annual tradition. Our goal is to celebrate the contributions of faculty from the previous academic year. The staff of the Health Sciences Library produces this bibliography, which is available in print and electronic form. (available at <http://library.nymc.edu>). After eleven years, it is becoming an institutional repository!

Since September 1993, this bibliography and the faculty scholarship it documents are celebrated at the annual Author Recognition Celebration. From the beginning the Dean and Provost co-sponsor the event with the Library, which we term a *sherry*. It is now a faculty development activity for the University.

Every effort is made to be as comprehensive as possible. The database begins with letters and submission forms sent to all 2900+ NYMC faculty from all three schools: School of Medicine, School of Basic Medical Sciences, and School of Public Health. Lists of faculty members are as of May 17, 2003. The letter is also sent to department heads, program directors, course coordinators, and the deans of the respective schools. An email reminder follows. In addition, standard bibliographical sources (see below) are searched and added to the database. Only twenty percent is duplication. Thirty percent requires manual entry which means that these citations were *not* found in electronic databases.

To meet model standards of documentation, each citation was verified against a copy of the publication. This year a number of web-based citations were submitted; they are documented as *of the date received* per current standards. Copies were obtained from the author, our collection, or through interlibrary loan. For inclusion, all authors *had* to cite NYMC *and have published between July 1, 2003 and June 30, 2004*. Overall, 750 sources are included representing the publishing efforts of 373 faculty members.

Sources

Journals, Journal Articles, Editorials, Reviews and Letters.

Citations are as complete as possible. The following indexing/abstracting sources were searched: PubMed, Web of Science, CINAHL, PsycINFO, LEXIS-NEXIS, Biomedical Reference Collection, Nursing and Allied Health Collection, Health Reference Center, Psychology and Behavioral Sciences and websites. The search methodology combined the designated field containing the author affiliation address with the publication years and types of publications. It must be noted that in some databases (e.g. PubMed) only the address of the *first* author is included. This is an inherent limitation when searching the institutional field in a database.

Books and Chapters of books.

The selection of books and chapters of books was made through library acquisition lists and author submissions. For the most part, books and chapters of books are not readily available in electronic databases. Therefore, authors are continually encouraged to alert the library about newly published books and chapters.

Arrangement

The arrangement of the bibliography is in two parts: by author and by department. The first part contains a listing of bibliographic citations alphabetized by first author. Each college author who is not a first author is cross-referenced to the first author. The full citation appears under the name of the first author. The second part contains a listing of all NYMC authors by departments and/or schools. Citations are formatted in accordance with the National Library of Medicine *Index Medicus*, which conforms to American National Standard for Bibliographic References ANSI Z39.29-1977.

This bibliography was compiled and edited by Cheryl Silver, Assistant Professor, Assistant Director of Information Processing. Nina Kurzban, Librarian, Paul-John Ramos, Assistant Collection Development Librarian, and Michael Modugno, Library Assistant, provided invaluable support in the production of this bibliography.

The Health Sciences Library is so pleased to acknowledge and promote the scholarly contributions of the faculty. The staff is also pleased to receive the support of the President, Provost, Deans, Department Chairs, Office of Faculty Development, and most importantly, our publishing faculty.

The Library invites feedback at any time.

Diana Cunningham, Associate Dean and Director
