EDWARD C. HALPERIN, M.D., M.A.  
CHANCELLOR AND CEO

August 28, 2018

Dear Colleagues,

New York Medical College is a community of scholars that exists for the generation, conservation, and dissemination of knowledge regarding the causes, prevention, and treatment of human disease and disability. There are many forces at work in society which seek to place other missions upon our agenda: economic development, job creation, real estate development, social reform, and political involvement. While, to some extent, we are of necessity engaged in these activities it should not divert us from what we truly are: a community of scholars. Clear evidence of fulfilling our mission is the publication of knowledge in peer reviewed biomedical scientific journals and books. Discovery science is incomplete unless the information which is generated is communicated to others. At our annual recognition event, we celebrate this effort and our mission. This event traces its origins to 1993 and, therefore, we are celebrating its 25th anniversary this year.

We celebrate the transgenerational nature of our efforts to generate and disseminate new knowledge. We seek, through publication, to communicate our findings to others and ultimately to make healthcare better for our grandchildren than it is for us.

This surely must be sacred work in our secular lives.

Sincerely yours,

Edward C. Halperin, M.D., M.A.

From the Library Director

28 August 2018

This publication of the New York Medical College *Faculty Authors Bibliography* marks the 25<sup>th</sup> annual edition. By our count, which is missing a year of data, that accounts for 17,809 publications. That number is astounding. When you think of all the hours that go into the production of one paper, from the genesis of an idea, to the background research, to the conduct of a study, to the preparation of a manuscript, editing, proofreading, submitting, revising and finally publishing, it is even more remarkable. We celebrate those nearly 20,000 publications and the many, many hours spent producing them by remembering, by promoting, and by celebrating. That is what the Faculty Author Celebration is about and that is why we create this bibliography every year.

Once again, I give many thanks to Nina Kurzban who puts her heart and soul into collecting the information about the NYMC publications that you see here in the *2017 Faculty Authors Bibliography*. And also, thanks to Jovy O'Grady, Scholarly Communications Librarian, who has spearheaded the Touro Scholar effort at NYMC. This year for the first time all publication citations and abstracts were entered into the Touro Scholar repository. Moving forward, Touro Scholar is the home for all NYMC citations, and it is our hope that researchers will embrace the Open Access movement and regularly deposit their full text manuscripts into Touro Scholar as well. Your doing so will increase the availability of your work which means: more readership, more citations, and more value.

We've come a long way from the print only bibliography published 25 years ago in 1993. That bibliography included 54 books and book chapters by 40 authors. This bibliography contains 12 books, 119 book chapters, 611 journal articles, as well as web pages, and editorial board listings.

Congratulations to each and every author for your productivity.

Marie Ascher, MS, MPH

Lillian Hetrick Huber Endowed Director
