Faculty Authors’ Bibliography
January - December 2018

Twenty-Sixth Edition

Valhalla, New York
2019
NEW YORK MEDICAL COLLEGE
A MEMBER OF THE TOURO COLLEGE AND UNIVERSITY SYSTEM

FACULTY AUTHORS’ BIBLIOGRAPHY

JANUARY - DECEMBER 2018

Compiled and edited by
Nina Kurzban, M.L.S

with support from

Marie Ascher, M.S., AHIP
Lillian Hetrick Huber Endowed Director
Health Sciences Library

Twenty-Sixth Edition

Valhalla, New York
2019

©NYMC Health Sciences Library
Note from the NYMC Library

Congratulations to all 2018 Touro and New York Medical College authors for your hard work in seeing your research through to publication and many thanks to the staff of the libraries of NYMC and the Touro College and University System who collaborate to organize this publication and the Touro Scholar institutional repository. I’d like to specifically thank Nina Kurzban, who puts her heart and soul into collecting the information about NYMC publications you see here. And Jovy O’Grady, Scholarly Communications Librarian, who has spearheaded the Touro Scholar effort at NYMC.

Publication citations and abstracts continue to be entered into the Touro Scholar institutional repository. This year we have also added the ability for faculty to self-submit accepted manuscripts into Touro Scholar and make them openly available for use. Open access increases the availability of your work to researchers and other interested readers worldwide, which will mean for you: more readership, more citations, and more value.

Many thanks to Donneer Missouri and Sara Tabaei at Touro Library for their work and to scholarly communications and the Touro Scholar initiative.

As a library we are committed to supporting research at every step of the process and promoting the work of our faculty researchers. Through this publication and through Touro Scholar we achieve this goal.

Marie Ascher
Lillian Hetrick Huber Endowed Director

Ochi R+, Chettimada S, Kizub I, Gupte SA+. Dehydroepiandrosterone (DHEA) inhibits $I_{Ca,L}$ and window current by voltage-dependent and independent mechanisms in arterial smooth muscle.

Oktay K see Taylan E

Omura Y+. Frequent waking up for urination &/or painful leg cramp(s) in advanced aged patients during sleep was one of important causes of fall & fracture which are major causes of disability & death. These problems can be reduced by simple change of available pillow from regular position to vertical position which can cover back of both head & part of chest which improve abnormal condition of spine & thymus gland function. Acupunct Electro Ther Res. 2018 Mar. 43(1):1-18. Dept: Family and Community Medicine DOI: 10.3727/036012918X15202760634905

Omura Y+, Lu D, Duvvi H+, Nihrane A, Shimotsuura Y, Ohki M. Human papilloma virus-Type 16 (HPV-16) & Human herpes virus-Type 8 (HHV-8) infections were found to be co-existing major cancer-contributing factors. Individualized, safe, effective treatment of hopelessly advanced cancer patients with metastasis by combining 4 methods of effective treatment: 1) Optimal dose of Vitamin D3 using its 10 unique beneficial effects, 2) Selective drug uptake enhancement method, 3) Stimulation of newly discovered thymus gland representation areas on the back of each hand, & 4) Identification & removal of co-existing cancer-contributing factors. Acupunct...
